## Lysine

1.Main ingredients: Amino acid 、 Crude protein、 Nitrogen

2.Appearance: white crystalline powder

3.Content of effective substances: 98.5%

4.Purpose: To promote growth, improve nutrition. Can be used as feed additives, food supplements and pharmaceuticals.

5.Function: mainly used for pig feed, poultry feed in the feed industry,its general dosage is 0.1 to 0.3 %. A lot of feeding trial data showed that the right amount of dietary lysine, not only can promote animal growth, and can reduce the amount of crude protein in feed, thereby reducing the farm's operating costs and improve economic efficiency.

6.Specification: 25KG/BAG

7.Origin place: China

8.Product picture:

## 9.Standard:

ITEM	UNIT	STANDARD DATA
DESCRIPTION	---	WHITE CRYSTALLINE POWDERS, COLORLESS CRYSTALS OR GRANULES
CONTENT	%	99.5-100.5
WATER	%	7.5-8.8
CALCIUM	PPM	75 MAX
IRON	PPM	5 MAX
OXALATE	PPM	100 MAX
HEAVY METAL	PPM	5 MAX
SULPHATE	PPM	150 MAX
SULPHATED ASH	%	0.05 MAX
CHLORIDE	PPM	50 MAX
AS	PPM	1 MAX
ALUMINUM	PPM	0.2 MAX
TRIDODECYLAMINE	PPM	0.1 MAX
LEAD	PPM	0.5 MAX
MERCURY	PPM	1 MAX
BACTERIAL ENDOTOXIN	I. U./MG	0.5 MAX
