

Cystine

1. Main ingredients: Cystine
2. Appearance: White hexagonal plate crystals or white crystalline powder, almost odorless
3. Content of effective substances: 99%
4. Purpose: Biochemical reagents, nutritional supplements, cosmetic additives
5. Function: Belongs to essential amino acids. It is essential substances for constituting the skin and hair. It can promote surgery and trauma treatment. Stimulate hematopoietic function, and promote white blood cell formation. Spices.
6. Specification: 25KG/Barrel
7. Origin place: China
8. Product picture:

United Fertilizer Chemical Co.,Ltd.

9.Standard:

Test Items	Standard
Assay	98.5% ~ 101.0%
Description	white crystals or crystalline powder
Specific rotation[a]D	-215°~ -225°
Chloride	0.02% max
Sulfate	0.02% max
Ammonium	0.02% max
Iron	20ppm max
Heavy metals	10ppm max
Arsenic	1ppm max
Loss on drying	0.20% max
Residue on ignition	0.10% max
PH	5.0~ 6.5
