### **Compound microbial fertilizer (Fruit and vegetable water soluble fertilizer)**

- 1.Main ingredients: Bacillus amyloliquefaciens,Jelly-like Paenibacillus
- 2.Appearance: Brown-black powder,sulfonium water soluble materials, trace element NPK = 25 solution Bacillus amyloliquefaciens and Jelly-like Paenibacillus, 18 bacteria derivatives, polypeptides.
- 3.Standard: Bacillus amyloliquefaciens,Jelly-like Paenibacillus $\geq$ 20 million/g, npk=25%,actual npk=30%
- 4.Purpose: Promote photosynthesis,enhance crop resistance, improve fruit set and yield
- 5.Function:Mainly used for agriculture
- 6.Specification: 20KG/BAG
- 7.Origin place: China
- 8.Product picture:
