

Compound microbial fertilizer (Humic acid economic water soluble fertilizer)

- 1.Main ingredients: Bacillus amyloliquefaciens,Jelly-like Paenibacillus
- 2.Appearance: Brown-black powder,sulfonium water soluble materials, trace element NPK = 6 solution Bacillus amyloliquefaciens and Jelly-like Paenibacillus, 18 bacteria derivatives.
- 3.Standard:Bacillus amyloliquefaciens,Jelly-like Paenibacillus \geq 20 million/g ,npk=6%.
- 4.Purpose: Promote photosynthesis, increase resistance, improve fruit set rate
- 5.Function:Mainly used for agriculture
- 6.Specification: 20KG/BAG
- 7.Origin place: China
- 8.Product picture:
