### **Microbial agents (Living bacterium number greater than 200 million/g)**

1.Main ingredients: Bacillus amyloliquefaciens, Eighteen bacteria derivatives

2.Appearance: Brown-black powder,humic acid, feces composting materials, Living bacterium number greater than 200 million/g, organic matter, Bacillus amyloliquefaciens, polypeptides, production according to the 240 million.

3.Standard: Bacillus amyloliquefaciens 200 million/g ,18 bacteria derivatives,strong rooting ability.

4.Purpose: Improve the comprehensive utilization rate of fertilizer, promote root seedlings, soil improvement, improve quality, increase production

5.Function:Mainly used for agriculture

6.Package: 20KG/BAG

7.Origin place: China

8.Product picture:
